MULUMBA NDAYI JOSHUA

Software Developer

Phone: +37259923658

Email: joshndayi4@gmail.com

Gender: Male

Address: Avenue Vietkauskaja vulica, Gomel,

I am a highly motivated and skilled software engineer with significant experience designing and building responsive websites. My academic background as well as my personal projects, available on my GitHub account, have allowed me to acquire solid skills in API integration and transforming interface designs into code using various front-end technologies.

I am proficient in several CSS and JavaScript frameworks and libraries, and am able to analyze and solve problems effectively. I also have a solid understanding of software development principles and an ability to quickly learn new technologies. Additionally, I am comfortable working in a team and am confident that I can make a valuable contribution to any software development project.

🎓 Education

September 2015 - June 2018 — Computer Network – UPL(Protestant University Of lubumbashi)
